Abstract

One of Indonesia's government efforts to enhance the quality of education is to do certification program and qualification test for teachers. These programs are expected to have a positive outcome which is a better and increased teachers' competence. On the other hand, teacher's well-being might be disturbed by a negative impact from the program. This research aims to seek the subjective wellbeing of teachers in Jakarta and how to help teachers reach its wellbeing. The method use Neuroresearch (mix method), a mixture of qualitative research to build a theoretical construct and also observation as well as in-depth interviews with various parties and quantitative method by using measurement instruments subjective well-being Likert scale. The results found that (1) elementary teachers tend heading to wellbeing significantly at á [removed]
